

# GTI's LNG Plant Operator Training CD

## Contents

### MODULE 1

#### Introduction

- Instructions
- Greeting

#### Topic Menu

#### LNG Fundamentals

- Terminology & Units
- Hydrocarbons
- Units of Heat
- Specific & Latent Heat
- Specific & Latent Heat in Vaporization
- Measurement Units
- Units of Pressure
- Temperature Units
- Absolute Temperature
- The Properties of LNG
- What Makes LNG Technology Special?
- What is a Cryogenic Liquid?
- What is LNG?
- Why Liquefy the Gas?
- How Do We Liquefy the Gas?
- Composition and Heating Value
- Composition
- Sources of Natural Gas
- Sour Gas
- Stranded Gas
- Dehydration & Sweetening
- Heating Values
- Heating Values of Hydrocarbons
- Heating Value of Non-Hydrocarbon Components
- Heating Value of Natural Gas
- Why is Gas Composition Important to LNG?
- Weathering
- The Relationship Between Composition, Heating Value & Weathering
- Returning Boil-off Vapor to the Pipeline
- A Comparison of Heating Values
- LNG Vapor Pressure & Liquefaction
- Normal Boiling Points of the Major Components in LNG
- LNG Facilities: Types of Facilities
- Peakshaving Plants
- Marine Receiving Terminals
- Remote Baseload Satellite Facilities
- Basic LNG Supply Economics
- Pipelines
- Peakshaving Economics
- Remote Baseload Satellites
- Section Exam

#### Gas Processing & Liquefaction

#### Gas Processing

- Gas Processing Overview
- Feed Gas Components
- LNG Components
- Simplified LNG Process
- How is LNG made?
- What is "Flash"?
- Basic LNG Thermodynamics
- P-H Diagram for Methane
- Making LNG
- LNG Purity
- Why Take Out the "Bad Stuff"?
- Solubility
- Aging
- Removal of Harmful Components
- What Impurities Can We Tolerate?
- Introduction to Gas Treating
- Process for Removal of Dust and Stray Oils
- Processes for Carbon Dioxide Removal
- Processes for Hydrogen Sulfide Removal
- Absorb or Adsorb?
- Amine Systems
- Amines
- An Amine System
- Amine System: Equipment Considerations
- Diagram of an Amine System
- Processes for Water Removal
- Desiccants (Molecular Sieves)
- Molecular Sieves
- Driers
- Drier Operation
- Molecular Sieve Driers Diagram
- Regeneration Gas
- Drier Breakthrough
- Driers: Equipment Considerations
- Mercury
- Odorant
- Deriming
- Diagram of Simplified LNG Process
- LNG Liquefiers
- Process Equipment
- Refrigeration Section Equipment
- Storage and Transfer Equipment
- Boil-off Gas Recovery Equipment
- Pressure Letdown (Flash)
- Piping
- Liquefaction Heat Exchangers
- Shell and Tube -Kettle
- Brazed Aluminum Plate Fin
- Diagram of Plate Fins—Flow Paths

Plate Fins-Flow & Distribution  
Liquid Vapor Distribution  
Plate Fins—Construction  
Spiral Wound Exchangers  
Spiral Wound Configuration  
Spiral Wound Construction

Section Exam

## Liquefaction

Gas Processing & Liquefaction  
Liquefaction Thermo  
Typical LNG Feed Gas Cooling Curve  
Heavy Removals  
Refrigeration  
Simple Propane Cycle  
Simple Evaporative Refrigeration  
Propane Cycle Example  
Propane Cooling Curve  
Simple Propane Cycle  
The Next Step  
Multi Stage Evaporative Refrigeration  
Next Steps to LNG  
Vapor Pressure of Key Refrigerants  
Natural Gas Cooling Curve  
Cooling Curve  
Introducing Cascade  
9-Stage Cascade System  
Two Types of Cascade Systems  
The Next Step for Cascade systems  
Physical Chemistry  
Physical Chemistry & Mixed Refrigerants  
Simple Mixed Refrigerant Cycle  
Refrigerant Components  
Typical Refrigerant Components  
Refrigerant Cooling Curve  
Mixed Refrigerant Details  
Mixed Refrigerant Systems  
Propane Precooled Mixed Refrigerant  
Air Products & Chemicals  
Mixed Refrigeration Systems  
SMR Cooling Curve  
Single Mixed Refrigeration—PRICO  
Single Mixed Refrigeration—PRICO II  
Single Mixed Refrigerant—Air Liquide  
Dual Mixed Refrigerant—APCI  
Simple Expander Cycle  
Expander Cycle  
Example 1: Methane  
Example 2: Nitrogen  
Expander Thermodynamics  
The Gate Station Plant  
Open Cycle or Gate Station  
Nitrogen Cycle  
Nitrogen Cycle Diagram

Section Exam

## MODULE 2

### Introduction

### Topic Menu

### Materials

#### Materials and Documentation

Terminology  
Metals  
Face-Centered Cubic  
Body-Centered Cubic  
Crystal Structure  
Crystallographic Structures of Different Metals  
What Makes a Metal Suitable for LNG Service?  
Material Tests  
Impact Testing  
Charpy V-Notch Test  
NDT for Carbon Steel  
Ductile to Brittle Transition  
Extrapolation  
Example: Cleveland  
Example: WWII Ships and the Titanic  
Metal Compositions  
Non-Metallic Materials  
Documentation—Terminology  
Factor of Safety  
Documentation  
Codes & Standards  
Inspections & Inspectors  
Codes & Standards for Inspections  
Inspecting Construction  
Record Retention  
Quality Assurance  
Quality Control

Section Exam

#### Welding and Corrosion

Welding and Corrosion Introduction  
Why Do Operators Need to Know About Welding?  
Terminology  
Rules for Welding  
Types of Welding  
Anatomy of a Weld  
Welding Heat Input  
Flux & Shield Gas  
Rod Ovens  
Welding Techniques  
Testing Welds  
Material Tests  
Importance of Stringent Testing  
Welder Certification  
Corrosion: 8 Categories  
Uniform/General Corrosion  
Galvanic/Dissimilar Metals  
Crevice Corrosion  
Stress Corrosion  
Erosion Corrosion

Pitting Corrosion  
Intergranular Corrosion  
Sensitization  
Sensitization Video  
Carburization  
Carburization Video  
Selective Leaching  
Where Does Corrosion Occur?  
Cooling Water Systems & Heat Exchangers  
Insulation  
Insulation (cont.)  
Dissimilar Metals  
Painted/Coated Surfaces  
Stainless Steel Surfaces  
Out-of-Specification Fluids  
Methods of Preserving Surfaces in a Facility  
Cathodic Protection  
Battery Cell Theory  
Sacrificial Anodes  
Passivation  
Coatings  
49 CFR 193

Section Exam

**Codes and Standards**

Codes and Standards

Why Do We Have Codes & Standards?  
Cleveland 1944  
Cleveland: Lessons Learned  
Cleveland: Codes That Reflect Lessons Learned  
Types of Codes and Standards  
Primary Codes and Standards  
49 CFR Part 193  
NFPA 59A  
Secondary Codes and Standards  
NFPA 70  
Cove Point, 1979  
49 CFR Part 199  
Codes & Standards for Canadian Facilities  
European Standard EN 1473  
Federal Energy Regulatory Commission (FERC)  
Grandfathering Under FERC  
Operator Qualifications Requirements  
Codes & Safety

Section Exam

**Storage**

Operations and Tank Dynamics

Introduction to LNG Storage Tanks  
Commissioning LNG Tank  
Cooling Down LNG Tank  
LNG Tank Ready for LNG  
Storage Tank Operation  
Safety & Operational Controls  
Operational Mistakes  
Level Detection in an LNG Tank  
Atmospheric Temperature Changes  
BOG Compressor Operation  
Maintenance of LNG Tanks

Operational Inspection of LNG Tanks  
Incidents Reports Around the LNG Tank  
Damage to Tank Caused by Frost Heave  
External Flanges at Tank Base  
Storage Tank Dynamics  
Barometric Pressure Forces on an LNG Tank  
Barometric Pressure and the LNG Tank  
Pressure Protection for the LNG Tank  
Vacuum Protection  
Boil-off Gas & Tank Pressure  
Heat Leak & Boil-off Vapor  
Vapor Generation During Steady State in an LNG Tank  
Barometric Pressure Drop  
Vacuum Conditions  
Stratification & Rollover in an LNG Tank  
Instrumentation to Monitor Rollover  
Loading Method for LNG  
LNG Tank Inlet Temperature  
Truck-Transported LNG Loaded into Tank

Section Exam

Tank Overview and Design

Overview  
Concept of LNG Storage  
Types of LNG Storage  
History  
LNG Tank Sizes  
Major Tank Components  
Materials Used to Build a Tank  
Types of Inner Tanks  
LNG Tank Containment Systems  
Initial Required Design Criteria  
Three Levels of Codes & Standards  
Construction Materials & Design  
Containment Systems  
Single Containment System  
Double Containment System  
Full Containment Systems  
Underground LNG Tanks  
Tank Components: Single Containment—Built on Ground  
Tank Components: Single Containment—Built on Piles  
Typical Components Inner Tank  
Impoundment Areas  
Tank Piping—Current Tank Design  
Tank Piping—External Pumps  
Boil-off Rate & Tank Insulation  
Tank Construction  
Tank Construction Sequence  
Perlite Insulation  
Hydro Test of LNG Tank  
LNG Tank Fire Protection

Section Exam

## MODULE 3

### Introduction

### Topic Menu

#### Piping & Valves

- Introduction to Piping & Valves
- Piping Codes
- Piping System Design
- Other Design Considerations
- Testing Methods
- Non-Destructive Testing
- Water Hammer
- Insulation
- Insulation—Moisture Ingress
- Insulation—Contraction/Expansion
- Insulation—Expansion Joint
- Cryogenic Valves
- Cryogenic Valve Design

Section Exam

#### Pumps, Compressors & Vaporizers

##### LNG Pumps, Compressors & Vaporizers

- Pumps, Compressors, and Vaporizers
- LNG Pump Characteristics
- Pump Characteristics Efficiency
- Pump Characteristics: NPSH
- Pump Cavitation
- LNG Pump Cost and Use
- LNG Pump -Site Location (Liquefaction Plants)
- LNG Pump -Site Location (Receiving Terminal)
- LNG Pump Features
- LNG Pump—Components Pot Mounted
- LNG Submerged Electric Motors
- LNG Lubrication & Cooling for Motor & Pump
- Pot-Mounted LNG Pumps
- Piping to and from LNG Pump
- Vent Piping From Pump
- Maintenance of LNG Pot Mounted Pumps
- In-Tank Pumps
- In-Tank Pump Components
- In-Tank Pump Components (cont.)
- In-Tank LNG Pump Removal
- LNG Pump Capacities
- In-Tank Pumps -Foot Valve Operation
- Cooldown/Start-Up of Pot-Mounted LNG Pumps
- Start-Up of LNG Pump
- Compressor Applications
- Compressors for Gas Applications
- Comparing Compressors
- Reliability
- Plant Capacity
- Compressor Characteristics
- Compressor Construction
- BOG Compressor
- Refrigerant Compressors
- Compressor Driver Selection
- Introduction to LNG Vaporizers
- Vaporization of LNG
- Vaporizer Heat Source
- Vaporization Selection

- Regasification Components
- Basic Types of LNG Vaporizers
- Integral Heated Vaporizers
- Inert Combustion Vaporizer
- Submerged Combustion Vaporizer (SCV)
- Remote-Heated Vaporizers (RHVs)
- RHV Components
- Ambient-Heated Vaporizers
- "Open Rack" Seawater Vaporizers (ORV's)
- ORVs-Seawater
- Process Vaporizers
- Power Plant Integration: Process Vaporizers
- Operational Issues with Vaporizers

Section Exam

#### Instrumentation & Controls

##### Instrumentation

- Instrumentation Fundamentals
- Types of Measurement
- Remote vs. Local Instruments
- Common P&ID Abbreviations
- Common P&ID Symbols
- Pressure Measurement Outline
- Bourdon Tube Pressure Gauge
- Gauge Panels
- Bellows Differential Pressure Gauges
- Strain- Type Pressure Transmitters
- Strain- Type Differential Pressure Transmitters
- Bringing Differential Pressure Instruments On & Off Line
- Differential/Pressure Procedure
- Flow Measurement
- Differential/Pressure Elements
- Types of Differential/Pressure Elements
- Differential/Pressure Flow Instruments
- Rotary Flow Elements
- Drawing of Rotary Elements
- Rotary Flow Instruments
- Level Measurement
- Local Level Instruments
- Remote Level Instruments
- Temperature Measurement
- Local Reading Temperature Instruments
- Examples: Bimetallic Thermostats
- Remote Reading Temperature Instruments
- Thermocouple Color Codes

Section Exam

##### Controls

- Control Systems Components
- Feedback Control Outline
- Open Loop Control
- Simple Closed Loop Control
- Proportional Control
- Proportional-Integral Control
- Proportional-Derivative Control
- Proportional-Integral-Derivative Control
- Proportional-Integral Derivative Interactive
- Proportional-Integral Derivative Non-interactive Control
- Tuning PID Controllers

Pneumatic Valves & Controls  
 "Pneu" What? Pneumatic Defined  
 Pneumatic Globe Valve Body  
 Pneumatic Valve Yoke & Spring  
 Pneumatic Valve Diaphragm  
 Pneumatic Valve Manual Operator  
 Diagram: Reverse-Seated Pneumatic Control Valve  
 More on Manual Operators  
 Photograph: Manual Pneumatic Valves  
 Failure on Loss of Air  
 Pneumatic Converters  
 Valve Positioners  
 Pneumatic Valve Positioners  
 How Positioners Work  
 Photograph: Pneumatic Valve Actuator  
 Electro-Pneumatic Valve Positioners  
 Programmable Logic Controllers  
 Discreet Input-Output  
 Analog Input-Output  
 The CPU Module  
 Ladder Logic  
 How Ladder Logic Works  
 Distributed Control Systems  
 Remote 10  
 DCSs and PLCs: The Differences

Section Exam

**MODULE 4**

**Introduction**

**Topic Menu**

**Safety**

Safety Basics  
 LNG Safety Hazards  
 Basics of Fire  
 Heat or Ignition Source  
 Flammability  
 Flammable Mixtures  
 Fire Prevention  
 Hazards to Personnel  
 Cryogenic Burns  
 Direct Contact with Cryogenic Liquids  
 Direct Contact with Cryogenic Vapor  
 Direct Contact with a Jet Stream of Cryogenic Vapor  
 Direct Contact with Metal Surfaces  
 Hypothermia  
 Heat-Related Burns  
 LNG Vapor Exposure  
 Asphyxiation  
 Protective Clothing  
 Daily Protective Clothing  
 Protective Fibers  
 Protective Clothing and Fit  
 Jewelry  
 Personal Safety Equipment  
 Face Shields vs. Safety Goggles  
 Hearing Protection

Accident Prevention  
 Section Exam

Hazardous Situations  
 LNG Releases  
 Identifying LNG Releases  
 Evaluating LNG Releases  
 Relief Valve Releases  
 Manuals and Emergency Procedures  
 Small LNG Releases  
 Leaks at Valve Packing & Flanges  
 Leaks at Hoses & Spool Pieces  
 Actuation of Relief Valves  
 Piping & Equipment Failure  
 Large LNG Releases  
 Emergency Responses to LNG Releases  
 Vapor Dispersion  
 Vapor Dispersion Rates  
 Controlling Vapor Dispersion  
 Weather Factors in Vapor Dispersion  
 Changing the Rate of Vapor Dispersion  
 LNG Vapor Cloud Fire  
 Deflagration & Detonation  
 Transition from Deflagration to Detonation  
 Deflagration vs. Detonation  
 Pressure Buildup  
 Thermal Radiation  
 Progression of Vapor Dispersion  
 Vapor Dispersion Risk  
 BLEVE  
 How Does a BLEVE Occur?  
 Will LNG BLEVE?  
 Rapid Phase Transformation  
 LNG Density & Rollover  
 Preventing Rollover  
 Geysering  
 Embrittlement  
 Embrittlement of Metal

Section Exam

Safety Equipment and Procedures  
 Hazard Detection Equipment  
 Is it an "Alert" or an "Alarm"?  
 Gas Detectors  
 Portable Gas Detectors  
 Flame Detectors  
 Methods of Reducing False Alarms  
 Smoke Detectors  
 Temperature Detectors  
 Thermocouples  
 Resistance Temperature Detectors (RTDs)  
 Fusible Links  
 Fire & Emergency Protection  
 Fire & Emergency Equipment  
 Protective Clothing  
 SCBAs  
 Portable Oxygen Meters  
 Portable Fire Extinguishers  
 Portable CO2 Fire Extinguishers  
 Portable Fire Protection  
 Fixed Fire Protection Systems

Water Spray Systems  
When to Use a Water Spray System  
High-Expansion Foam  
Normal Operations  
Emergency Procedures  
Scheduled Maintenance

Section Exam

### **Operations & Security**

Operations & Security  
General Practices & Procedures  
Preventing Accidents  
Start-Up Procedures  
Start-Up Pre-inspection  
Start-Up  
Cooldown Fundamentals  
Tank Cooldown  
Tank Cooldown Procedure  
Cooling LNG Pumps  
LNG Pump Cooling  
LNG Pump Cooldown  
Piping Cooldown Procedures  
Purging and Isolation Practices  
Tank Purging  
Pipe Purging  
The Purging Process  
Resources for Purging Procedures  
Shutdown Procedures  
Shutdown  
Unscheduled & Emergency Shutdowns (ESDs)  
Unscheduled Shutdowns  
Emergency Shutdowns  
Introduction to Plant Security  
Example: Security at ALT Facility  
What Triggers a Security Breach?  
What the Offender Might Be Thinking  
Types of Facility Access  
Effective Measures for Preventing Access  
Attitudes Within the Facility  
Possible Effects of an Attack  
The Terrorism Scare!  
Additional Security Concept  
Plant Protection Measures  
Three Steps to Win the "Security Game"  
Security Points to Remember

Section Exam

### **Quality Assurance & Quality Control**

The QA/QC Program  
Project QA Guidelines  
QA/QC Organization  
QA for the Project  
Critical Areas of QA/QC Construction  
QA/QC Document Retention  
QA/QC During Plant Maintenance

Section Exam

## **MODULE 5**

### **Introduction**

#### **Topic Menu**

#### **Utility & Support Systems**

Introduction to Utility and Support Systems  
Utility and Offsite Units  
Utility Reliability  
Utility Layout/Design  
Electric Power  
Emergency Power  
Fuel Gas  
Cooling Water  
Instrument and Plant Air  
Nitrogen  
Fresh Water/Potable Water  
Flare and Vent System  
Wastewater Disposal  
Odorizing System  
Metering  
Communications Systems

Section Exam

#### **Trucking**

LNG Trucking  
Introduction to LNG Trucking  
Trucks for Transporting LNG  
Why Do We Liquefy Natural Gas?  
What Are the Safety Concerns When Handling LNG?  
LNG Density & Vapor Pressure in LNG Trailers  
Temperature, Density, and Pressure  
How Long Can a Trailer Hold LNG Before Venting?  
Insulation "R" Values  
Determining Liquid Level in the Trailer  
LNG Truck Operations  
LNG Trailer Tank Design  
A Typical LNG Trailer (Schematic)  
Safe Loading  
Discharge Procedures  
Other Important Safety Precautions  
Non-Routine Procedures and Problems  
Cooling Down a Warm Tank  
Trailer-to- Trailer Transfers  
Carrying Different Cargoes  
Loss of Air of Pneumatic Valves  
Potential Hazards Related to LNG Transfer  
Actions/Conditions that Create Hazards from Trailers  
Actions of Personnel that Create Hazards

Section Exam

## **Other LNG Applications**

- LNG Applications
- Other LNG Applications
- Natural Gas Vehicles (NGVs)
- LNG as a Vehicle Fuel
- Heavy-Duty Vehicles
- Medium-Duty Vehicles
- Light-Duty Vehicles
- Passenger Cars
- NGVs and Fleets
- Using LNG for Railroad Locomotives
- LNG for Ship Engines
- Ships that Transport LNG
- Barges
- Receiving Terminals
- Typical Receiving Terminal
- Section Exam

## **FINAL EXAM**
