LNG Classroom Course Participants...

## Introduction to Liquefied Natural Gas

GTI's new online course puts you in charge of an LNG project while building your knowledge base and skills.

**Log on—anywhere, anytime—**and become a project manager for a fictional-but-real-world LNG project. Using a learn-by-doing approach, you'll analyze optimal LNG regional markets and select a preferred LNG buyer—and quickly begin making decisions for your company.

With this self-paced course, you'll gain and apply knowledge on the following topics: The LNG chain; project roles; markets; sales and purchase agreements; buyer and seller requirements; pricing; and short-term trading.

Each of the four course tasks provides an activity with immediate feedback to reinforce your understanding of the material. Activities you work through in the eCourse include—

1. Interview LNG Experts
2. Identify LNG Markets
3. Analyze Sales and Purchase Agreements
4. Select an LNG Buyer.

**Get access to this eCourse at the discounted tuition of only \$150** (a 50% savings) with your paid registration for any one of GTI's LNG classroom courses. To take advantage of this offer, complete this form and fax it along with the registration form for the LNG classroom course you will be attending. We will provide a user name and password when we receive both registrations. Or contact us by e-mail. This offer expires three months after the classroom course you attend.

### Who will benefit?

This Internet-based course is ideal for you if you're involved in operating or planned LNG projects and wish to broaden your understanding of the LNG chain. This includes—

- > Buyers or sellers of LNG
- > Engineers involved in the design and construction of projects
- > Shipbuilders and ship owners, financiers, attorneys, and government officials in both producing and consuming countries
- > Government regulators
- > Anyone who wants to know more about this increasingly important energy source.

### Pre- or post-course advantages—

Take this eCourse as a preview to help you become familiar with the terminology and concepts discussed in the classroom. Or use it as a refresher/reminder of information learned in the classroom course.
